CONVERSION BUISNESS FOR TECHNICAL TEXTILES.

Convert Technical textiles to make money.

WHY DO WE NEED TECHNICAL TEXTILES?

Because the production of cotton is and cannot be enough for all of our needs of Clothing, Curtains, Bed-sheets, bags, covers.

At times Technical textiles are made from Various plastics, government provides subsidies!

BECAUSE Again,
Some raw materials have no substitutes so far, either not seen any, in the near future.

**MOST SIMPLE CONVERSION AS PERCEIVED BY
MOST SO FAR.**

Spun Bonded and double spun bonded non woven Fabric Conversion.

FIRST AND MOST COMMON TECHNICAL TEXTILE: SPUN BONDED NON WOVEN :

Non Woven Spun Bonded Fabrics' conversion
in to Shopping Bags.

Business can be initiated for:

Rs. 40 Lac to Rs. 65 lac with fully fledged
Printing and all kinds of bag making.

SECONDLY CAN MAKE RICE BAGS

Within Rs 40 lac can initiate this business of Rice bag making.
Get Laminated, printing from vendors.

THIRDLY MAKE: MASKS

Within 50 Lac can
make The two kinds
of masks.

4: MAKE BOUFFANT CAPS.

Investment of Rs 12.5
to 15 Lac can make
such caps.

5: MAKE SHOE COVER

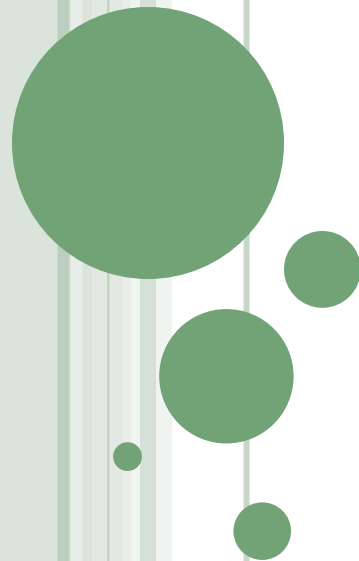

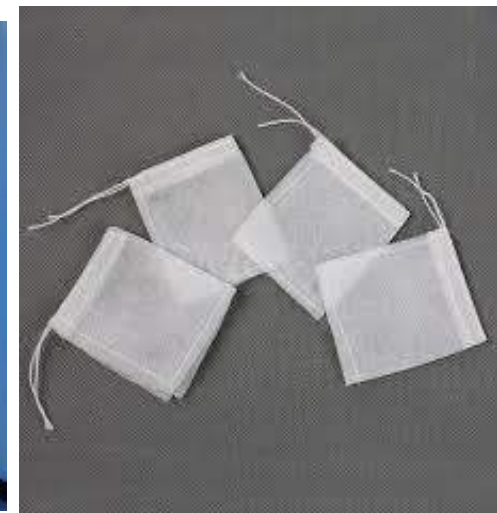

Within Rs 12.5 Lac we can
make shoe covers.

MELT BLOWN TECHNICAL TEXTILES' APPLICATIONS

PICTURE COURTESY: SHAOLIN SCHOOL OF MARTIAL ARTS.

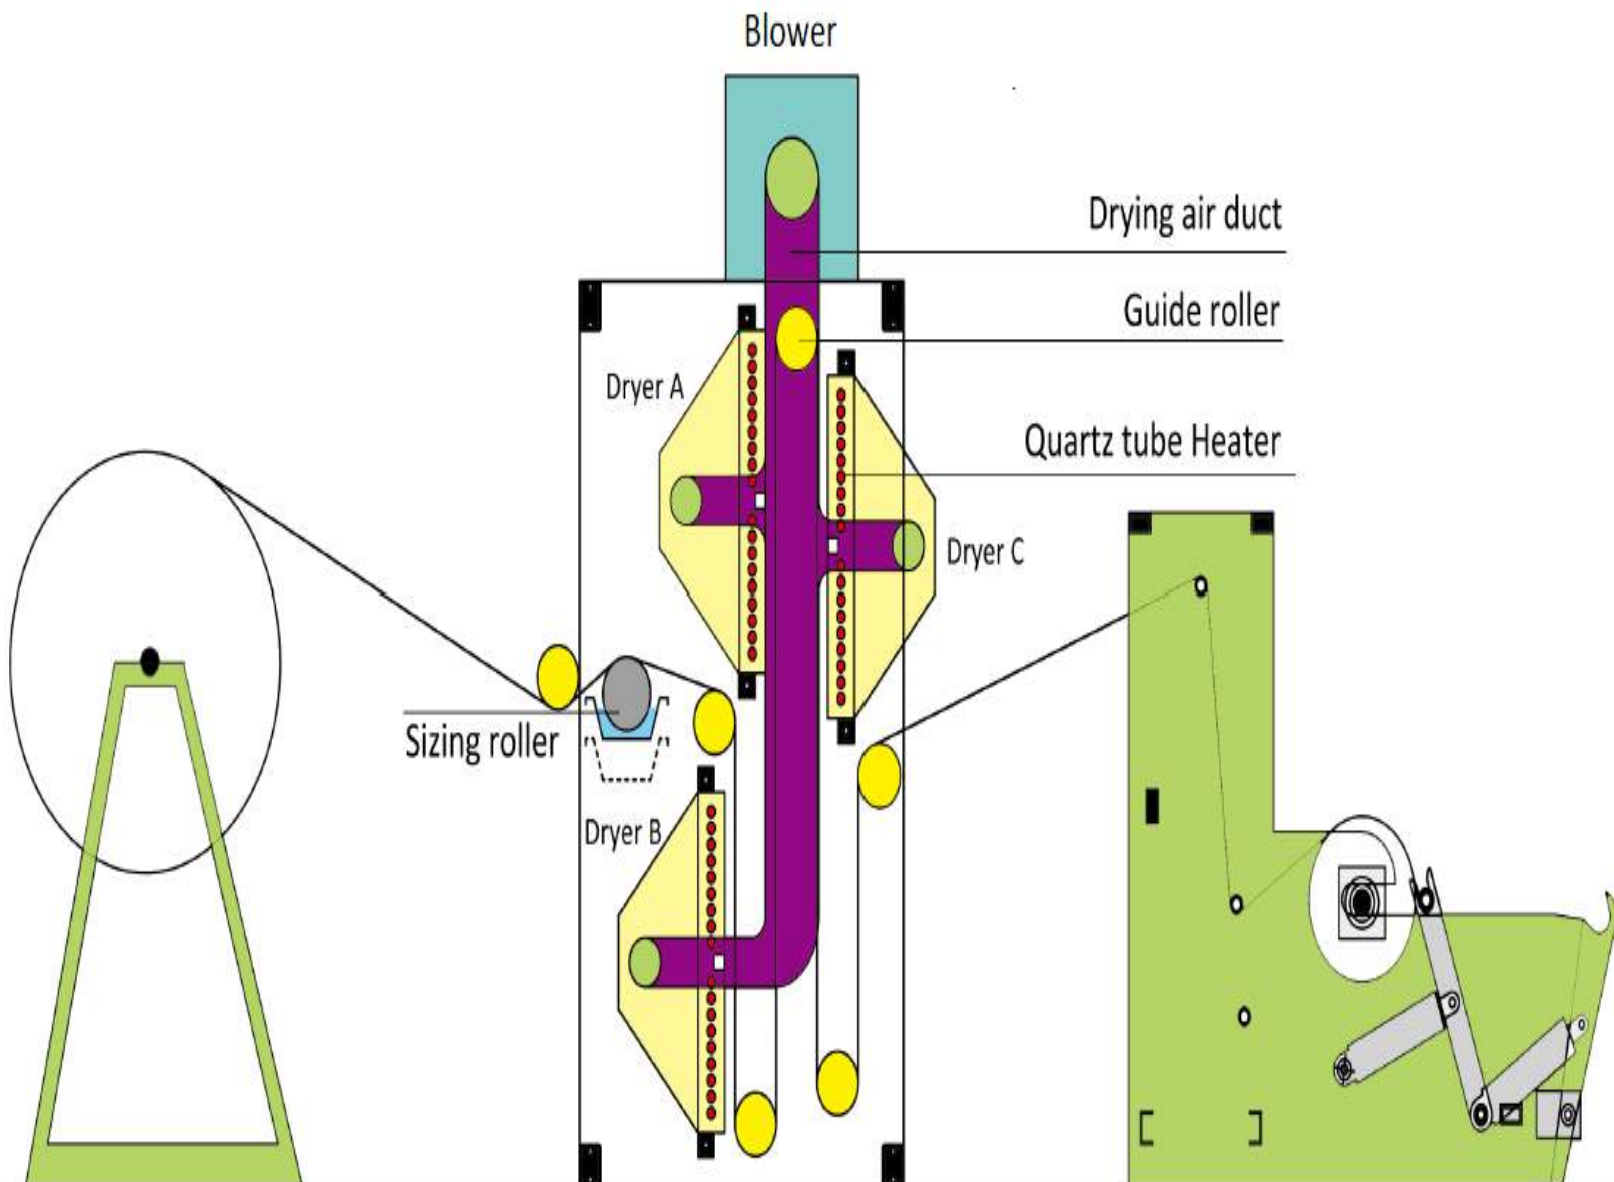

HYDRO-PHILLED SPUN BONDED

Inside layers of Diapers and Sanitary Napkin has to be Hydro-philled to absorb Water.

Hydro-philic treatment to Non Woven is a must for this purpose.

Investment is 1.6 Meter Width Equipment, Un-winder and Re-winder Machines. Rs. 50 Lac needed for the Quality Off line Equipments.

COST TO CONVERT NON WOVEN IN TO HYDRO-PHILLED MATERIAL.

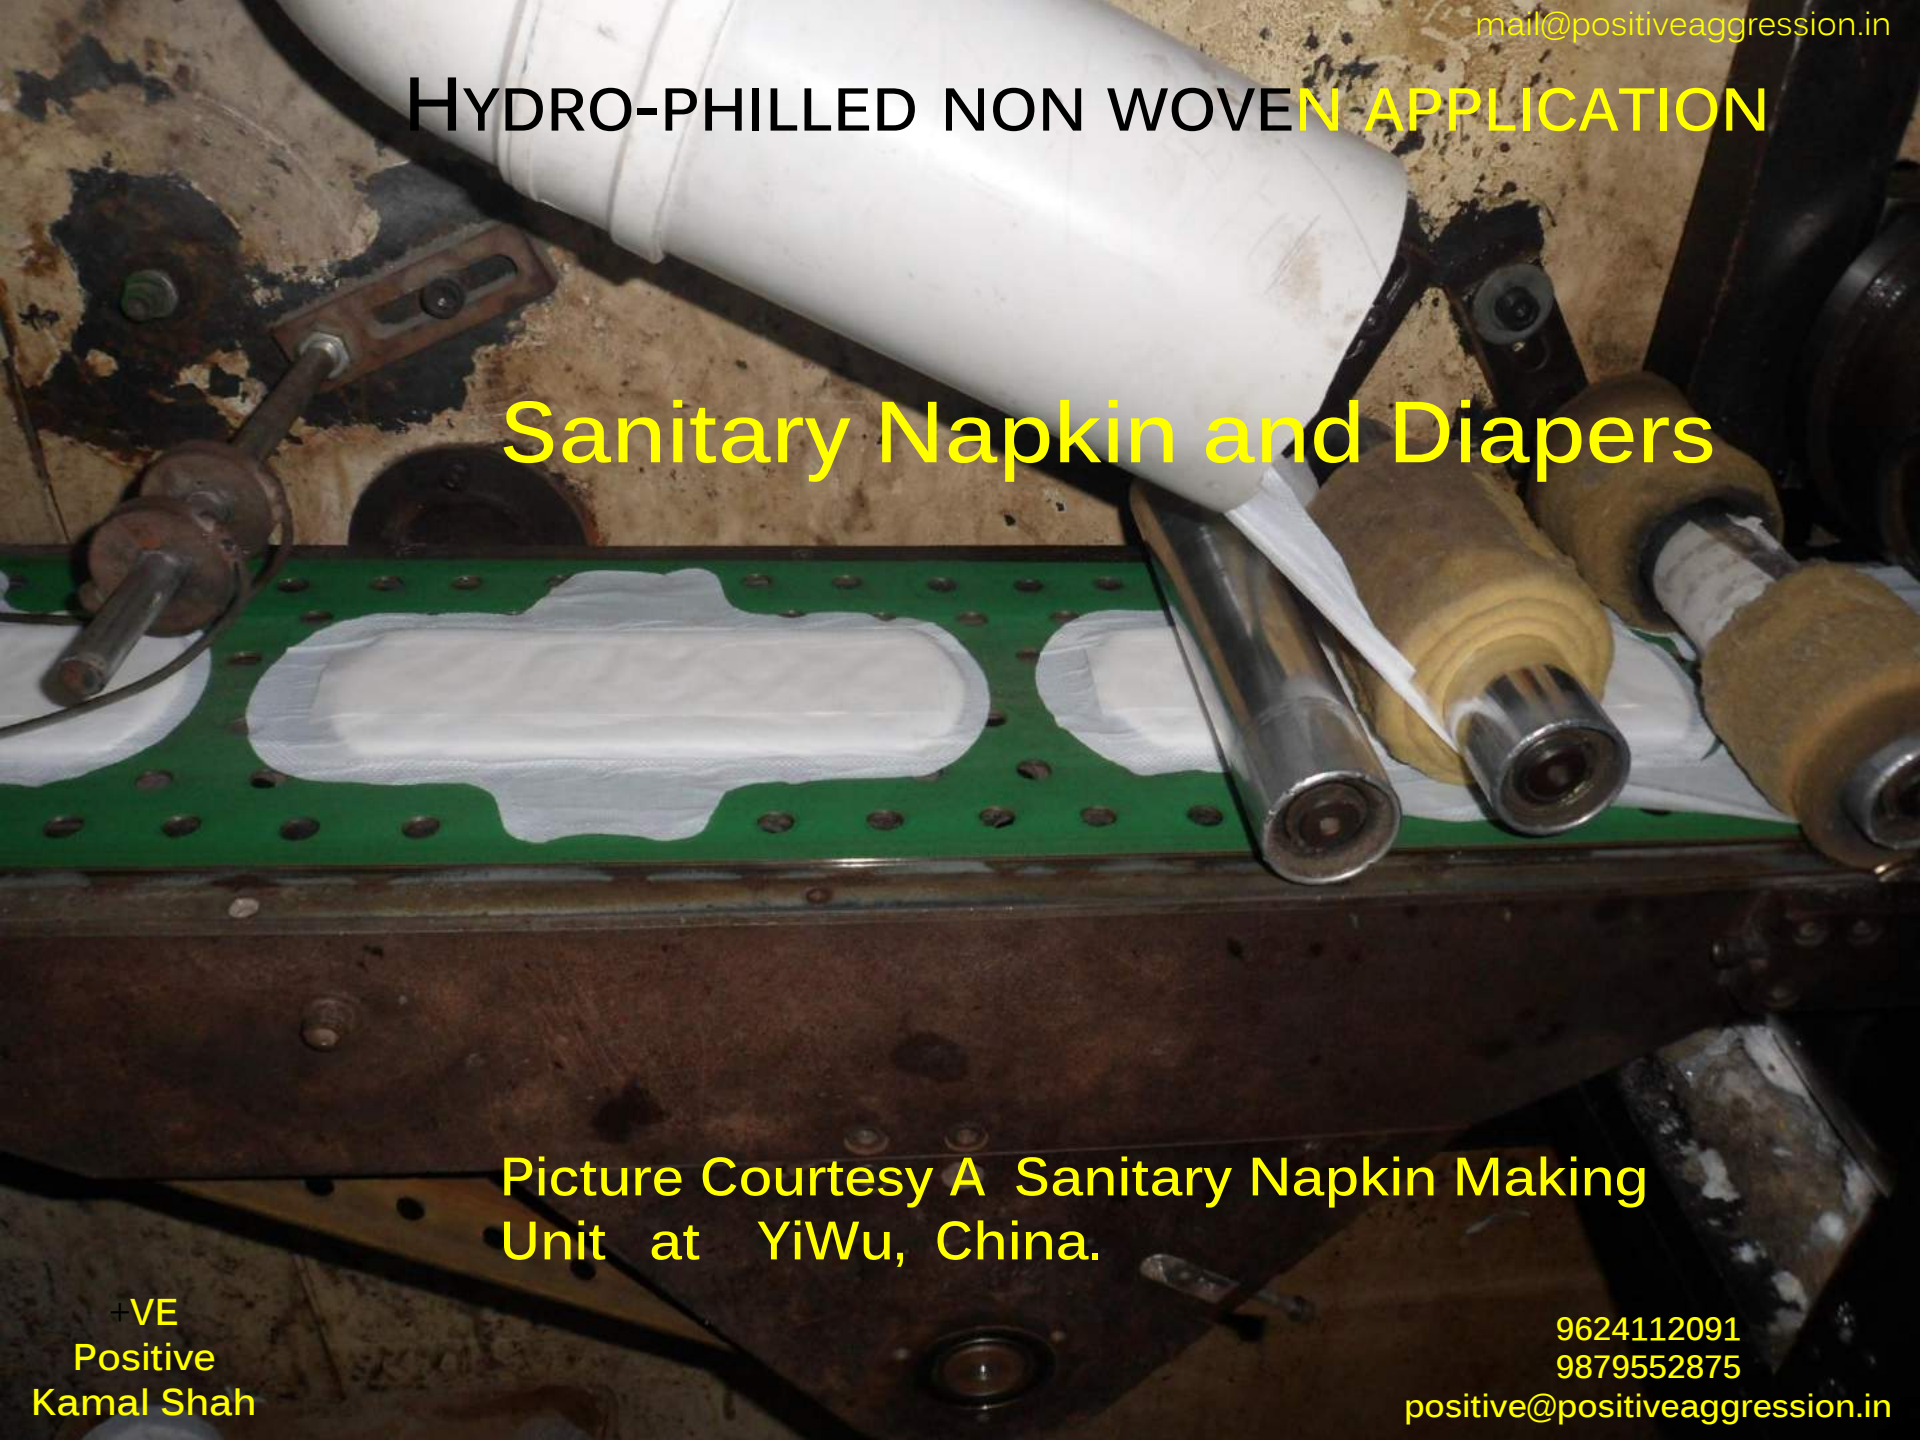

About Rs 50 lac of worth of
machinery can make the normal
Spun Bonded non woven in to
Hydro-philled material.

(A BIG EXPORT MARKET EXISTS)

Main equipment as above picture
plus an un-winder and a re-
winder machines needed.

HYDRO-PHILLED NON WOVEN APPLICATION

Sanitary Napkin and Diapers

Picture Courtesy A Sanitary Napkin Making Unit at YiWu, China.

WHY MAKE NAPKINS?

Ladies get periods in :

Cities: Form age 14 to 40 / Villages: From age 14 to 50

Frequency: once a month / Days: 3 to 5.

More demands gets now shifted in Villages due to :
Least expenses on Education, insurance.

More flow of money on account of Free electricity, free seeds, subsidies. Land costs, Better realization of Agricultural products.

Education spread and more spread of media and knowledge on Napkins and sanitation products.

PLUS.....

Big Export Market.

China enjoys today the entire of their Overseas Market.

Free idea worth Millions.

GO to smaller overseas Pharma & Healthcare companies who can buy and market products in their names.

Take deep
Breath
And Relax.

TECHNICAL TEXTILES ARE NOT LIMITED TO ABOVE NON WOVEN ONLY.

Other Important technical textiles are :

**Car Carpets,
Floor Carpets (That you see
when go to the exhibitions)
Geo-Textiles for underlying,
Applied for Separation,
Reinforcement, Filtration and
Drainage.**

GEO TEXTILES ARE WOVEN AND NON WOVEN BOTH

Woven Geo Textiles	Non Woven Geo textiles
Soil separation, load distribution, reinforcement, drainage and filtration.	Soil separation and stabilization, load distribution and drainage- ----- but not for soil reinforcement.

GEO TEXTILES ARE PERMEABLE

Geo Textile allows the movement of air, water and fertilizer. It is often used in landscaping projects and civil engineering applications such as Dams, Canals, Airfields, Roads and Roofs.

NEEDLE PUNCHING, GEO TEXTILE LINE LOOKS LIKE:

WHY NEEDLE PUNCHED NON WOVEN ?

**Development:
Highways, Airports
and similar projects
and transportation
infrastructure.**

HOW CAN SMALL INVESTORS WORK?

- 1) Collect PET Scrap : Bottles.
- 2) Wash and crush them and convert.
- 3) Sell Polyester Washed Crushed Scrap.

Big Investors will convert this scrap in to

Polyester Staple fibers

In to Polyester staple fabric

In to polyester staple yarn

In to Polyester Fabric

In to Polyester Quilts, Soft Toys, Pillows,.....

Picture courtesy: a PSF making plant at ZhangjiaGang near ShangHai.

POLYESTER SCRAP CONVERSION

PET bottles (Cool Drink bottles, Medicine Bottles, Oil, Acid, all kinds of Polyester bottles) washing Crushing plant.

All kinds of waste polyester, PET popcorns. Et-cetera to be converted in to Polyester Flakes.

PET BOTTLE WASHING CRUSHING BUSINESS

With Rs 70,00,000/- worth of Standard quality machinery one can start this business. PET Flakes made so go to make technical textile (PSF).

BIGGER INVESTORS WILL HAVE THIS

A textile mill

WHAT SHOULD WE DO AT MINIMUM COSTS?

Opportunities to a new Entrant :

Bag is a real Big Market.

Go to all shops, do not leave even one:
Jewellery, Textiles, Cosmetics, Electronics, all
consumer goods, Grocery, malls.....

All can need bags to carry and shop.

THINK OUT OF THE BOX.

Try and sell Bags with advertisements printed on them.

The advertiser can subsidize the cost of bag.

The purchaser can get it cheaper.

Print Events, occasions, Messages, anything that comes across.

BAGS TO REPLACE CLOTH BAG

People have tried to sell non-woven bags as a replacement of a CLOTH bag.

Make Colorful (Multi-color) Bags for Ladies and sell in open market.

The jewelry and Saree shops can gift such bags to their loyal customers.

CITY SCHOOL BAGS.

Make Stronger, colorful
school bags.

HUGE replacement,
continuous, guaranteed
and repetitive market.

A VERY BIG MARKET.

**Replace plastic carry
packs in to non woven
carry packs for very
many kinds of
stationary items.**

BAGS FOR THE COLLEGIANS

Imitation is our Permanent National disease. And so ours is a country of unlimited opportunities.

Ours is a country of followers and it is easier to Become Kejriwal , Keep this in mind.

When on day one you can sell 1st bag, to a College going kid, 2nd, 3rd, 4th will follow automatically from day 2nd itself.

CURTAINS AND BED COVERS.....

Just Buy Non woven, stitch sides and make bed covers for the day time. **Buy in kg. and sell per pc.!**

Make curtains and pack and position in the Market.

In fact we cannot foresee, cannot make money, because we are lazy, we do not want to work hard to sell.

IN FACT MAKING NON WOVEN FABRIC HAS GONE CHEAP NOW. HOW?

Good quality, almost unused 2nd hand plants are available at half the cost of New.

So the conversion cost is reduced to much extent on Interest and depreciation aspects.

Time is back to make Non Woven Fabric., AGAIN.

WHY MAKE NON WOVEN FABRIC?

Because Basically It is an alternate Fabric making where there is Government Subsidy.

If you make Non Woven, you are serving Mother INDIA because we do not grow enough Natural Cotton.

Not much of Technical to make, is Easier.

It is conversion of Plastics in to technical textile. Such Technical textile is easily recyclable and so no problem.

WHY MAKE NON WOVEN FABRIC?

Making money is easier. And so
make Non Woven or Technical
textile.

The need is for hundreds of
applications.

WHY MAKE NON WOVEN FABRIC?

**Good Quality Sales
People are available to
Market the Fabric, if
you make good quality
with timely service.**

This is most important.

CONVERSION ? ? ? ? ? ?

Take along smaller people to
convert Non Woven.

Join with people.

Find out the industrious people.

Find out people with Capital.

WELCOME TO US, TO DISCUSS.
