

PVC One / Two / Three layered Soft Floor:

The applications:

Public and private places, for laying on the floor where huge populations pass by always. Try with INDIAN Railways like customers where we get huge orders.

Investment in the project can be:

Initial Project cost	INR Rs. Cr.
Machinery	3.5
Building	1.8
Utilities and other initial startup cost	0.6
Land cost Assume at	2
Total	7.9

Courtesy slightly higher initial investment cost, any and every T /D/H cannot enter in to this project. The professional people only can get along with Government companies and agencies and so unorganized characters are restrained automatically. This is the best Entry barrier.

Can think of this project immediately.

And this project can make many kinds of flooring mates for hundreds of applications.
